INNER GETS THREE YEARS. FRUIT FOR ENGLAND. Delegate Convicted of Per-Second Experimental Shipment Leaves and Sent to Penitentiary at Third New York Today on Steamer St.

at St. Louis. Paul for a Good Market.

IRY DIRECT WIRE TO THE TIMES!

NEW YORK, Aug. 5.—[Exclusive Dispatch.] The second experimental shipment of fruit to England goes tomorrow on the St. Paul. It will consist of 4097 boxes of Bartlett pears, 1390 boxes of Congress pears, 2333 crates of plums and prunes and ten boxes of peaches. The first shipment sold high even though some peaches were chilled on the way. At another sale of fresh fruits held last week in London, even higher prices prevailed. Experiments made so far seem to demonstrate that there is a good market for American fruit in England, provided it arrives in passable condition.

Exportation of apples has opened rather earlier than usual, and more are going across. For good-quality apples a moderately high price is paid abroad, and indications are said to point to good business throughout the season. Paul for a Good Market. OUIS, Aug. 5 .- Harry A. AFFECTED FIRMS AND STOCKS. [BY THE ASSOCIATED PRESS-P.M.] NEW YORK, Aug. 5.—Two more Stock Exchange failures, making a to tal of six in the last eleven business days, were recorded today when Sharp & Bryan and Huributt. Hatch & Co. announced their inability to meet their obligations. Neither failure occasioned obligations. Neither failure occasioned the slightest surprise, in fact both had been discounted for a week or more.

The failure of Sharp & Bryan came during the morning session, shortly after the stock market had recovered from its demoralized consider. from its demoralized opening. That of Huributt, Hatch & Co. was announced in the afternoon, just as prices throughout the list were tumbling lower than at any time.

lower than at any time.

The day's business can best be summarised by the statement that almost four-score of stocks, fully two-thirds of the active list, touched the lowest record reported during the movement record reported during the movement which had its inception last September. At the close of the day some of the solid interests, and it is suggested that these interests have been "out of the suggested that these interests have been "out of the suggested that these interests have been "out of the suggested that these interests have been "out of the suggested that these interests have been "out of the suggested that these interests have been "out of the suggested that the suggested the suggested that the suggested the suggested that the suggested the suggested that the suggested the suggested that the suggested the suggested that the suggested that the suggested the suggested the suggested that the suggested that the suggested that the suggested that the suggested the suggested that the suggested the solid interests, and it is suggested that these interests have been "out of the market" for weeks past, save here and there when support was most necessary, spoke reassuringly. They declared that the financial atmosphere was being clarified, but for all that, Wall street as a whole could see no silver lining in the clouds, much less a golden one.

Other failures were confidently pre-dicted, and the names of several im-portant firms were mentioned as among those in financial straits. A sharp break

The day began ominously. Opening prices on the exchange were decidedly lower, almost all through the list, but the break was checked by supporting-orders. In fact, veteran observers were heard to declare that but for this support a panic would certainly have The Sharp & Bryan failure made but

The Sharp & Bryan failure made but little impression on values, but toward noon the list receded, the decline embracing virtually all the standard stocks. The market then became dull and hesitating, but in the last hour and a half stocks were again thrown over ruthlessly, and the closing was weak and extremely feverish.

Today's shrinkage alone aggregates many millions of dollars. Countless stop-loss orders were caught in the selling avalanche, and it is probable that hundreds of weak accounted were closed in utter disregard of the losses sustained by their owners.

COUNSEL'S STATEMENT.

INT THE ASSOCIATED PROSEANA!

NEW YORK. Aug. 5.—Cromwell, counsel for the assignee of Sharp & Bryan, made the following statement:

"The firm made the general assignment for the purpose of insuring equality among its creditors without preference. The cause is directly attributable to the sudden and extreme shrinkage in the market value of the securities of the firm. The liabilities, mostly secured, are about \$5,000,000. The value of assets, comprising almost exclusively stock-exchange securities to the amount of several million dollars, is dependent on market conditions. Most of the creditors, recognizing that present conditions are short-lived, are very fairly and wisely witholding their securities from sale."

An unofficial statement was made to the effect that the firm had no open contracts in the market, and that at today's prices there was still a fair margin on their loans. It was arranged that if prices did not decline further the firm would be able to liquidate its assets on a satisfactory basis. Sharp & Bryan were prominent in operations on the curb. They were specialists there in American Bridge. Northern Securities and Seaboard shares. The firm offered large blocks of Seaboard shares for sale on the curb yeaterday. The greater part of their obligations on the exchange were liquidated yesterday, and several banks and trust companies threw out their loans. In fact, the greater part of yesterday's liquidation on the exchange was for Sharp & Bryan's account. COUNSEL'S STATEMENT.

Both footpads were rrested, and in February, 1902, each has gentenced to twenty years imprisonment.

was gentenced to twenty years imprisonment.

WOODLAND, Aug. 5.—Convict Roberts in an interview said he and Howard left the band of convicts immediately after the battle of Pilot Hill. They doubled back on the trail and made for Sacramento. They lay in the brush on the river near Sacramento since Monday night. There they disagreed as to future plans. Roberts santed to make for San Francisco and the out of that port, while Howard Brought it best to take the trains. While in the brush, Roberts sent a tramp into Sacramento for provisions and apium, which proved his undoing. The tramp "squealed" to the officers, telling them of Roberts's intentions to make for the coast.

Roberts left Sacramento Tuesday and walked to Davisville in daylight. He found a hiding place on Putah Creek, and lay there for the rest of the day. He intended taking a freight train last evening, but the unexpected appearance of officers upset his plans. While on Putah Creek Roberts sent another tramp into Davisville for more opium. It was through that means that officers located him so easily. He said that he had no chance against so many men who had the drop on him. Work.

When the visitor's appetite was satisfied, he walked to the counter and threw down a five-dollar piece, receiving change and the package of food. During the stranger's stay at the hotel, which lasted about haif an hour, he appeared somewhat nervous and watched the movements of every person who came into the room. On leaving the dining-room, he backed out of the door as if afraid some one might attempt to shoot nim should he leave the room in the usual manner.

Before leaving the premises he drew a bucket full of water from the well and carried it away with him. No effort was made by the hotel people to question the stranger and nothing was done to ascertain the direction in which he traveled. Sheriff Bosquit was not notified of the occurrence until last night, and in consequence thirty-six hours elapsed before an investigation of the story commenced. Sheriff Bosquit dispatched his son Dallas to Shingle Springs early this norning to investigate the report. The young man returned to Placerville this afternoon and stated that on his arrival at the Planters' Hotel, he ascertained the names of several people who had seen the stranger Monday night, and taking each person saide, he showed him photographs of all the escaped convicts. Without hesitation, all identified the pleture of Case as the man who had eaten the meal at the hotel, and who had purchased, supper for an alleged sick companion.

A young man who was attracted by the rough appearance of the stranger. When the visitor's appetite was satis-

etery, and there discovered tracks made by heavily-nailed shoes, and indicating by the large number of prints that one or more persons had stopped at that point for some time, walking around anxiously as if walting for some one. Following this trail Bosquit discovered the marks of rubber-heeled shoes. It is known that Case took a pair of rubber-heeled shoes from Stage Driver Brown of Folsom penitentiary, Brown being one of the men the convicts took with these traveled all day today, but lost their way traveling in a circulaboes from Stage Driver Brown of Folsom penitentiary, Brown being one of the men the convicts took with them from the prison on the night of the outbreak. A well-defined trail led Besquit to Smith's place, a mile north of the botel on Tennessee Creek read, where the remains of food under a fig tree indicated that the men had stopped while lunch obtained at the hotel by Case was eaten. It is generally believed that one of Case's companions, if he has more than one, is Seavis, the negro, and that Seavis did not accompany Case to the botel because of his color and a very notice; able scar on his face, which would be tray him.

sheriif Bosquit will probably send a party of men from here to take up the trail at Shingle Springs, and unless he hears convincing news that the posses now in Webber Creek country with Ferrell's bloodhounds have found a fresh trail in that section, he will send the posses and dogs to Shingle Springs, or to some other point to take up the chase. Sheriif Bosquit made the following statement to the Associated Press tonight:

"It is a settled fact in my mind that Case and one or two others were in the vicinity of Shingle Springs Monday night. I am satisfied that it is the best track we have to work on, outside of the pursuit which is being prosecuted in the Cat Creek country by Sheriif Norman and his posses, the men I sent from here Monday night to follow up the five men who mardered Rutherford and Jones. I have great hopes that the trail discovered at Shingle Springs will lead to something conclusive. If it were not for the fact that the men already have the start of over forty-eight hours, I would be thoroughly satisfied."

Sheriif Bosquit received a telephone message from Lotus tonight which was sent by a special mounted messenge from the Webber Creek posse, stating that today's work of the posse had been investigated and every trail followed without success. Tonight the posse and the bloodhounds are in the vicinity of the Jurgen place, and unless a trail is struck before dark the posse will spend the night at the ranch.

DOGS FOLLOW SEVERAL LEADS. the Orilla ranch; to the cabin of the negro miners near Pilot Hill, and to the Chapman place, where, on Saturday night, Case and the negro Servis had supper, and where Case amused himself for half an hour by nursing the infant child of the Chapmans. If the Webber Creek trailers do not run across a good lead tomorrow, the dogs and men will be sent to Shingle Springs to prospect that vicinity for a clew.

Sheriff Mansfield of San Mateo county, who is at Georgetown with exSheriff Conroy of Piacer, telephones to Sheriff Bosquit today that he and his party had been following the trail of two men in the Georgetown country since Monday, and that it led the hunters up Rock Creek to the vicinity of Bald Mountain. Sheriff Mansfield stated that he would immediately secure additional men and supplies at Georgetown, and take up the search more vigorously. Bob Mohrter, a Georgetown constable who has been with the party several days, however, arrived here tonight, and states that it is his opinion that the trail has been lost, and that a fresh start will have to be made.

ment, is going to Sacramento to try and secure from Col. Stone a cancellation of the order issued to the ocmpany, commanding it to proceed to Seria Cruz, to participate in the annual encampment of the National Guard of California.

The members of the company feel that they have lost so much valuable time during the past ten days in pursuit of the escaped convicts from Folsom, that they can ill-afford the time to take up the duties of camp life.

Sheriff Bosquit is indignant at the indifference shown by some of the citizens of county, who either fail to report. Important developments at all, or wait until it is almost too late to do anything, or else flood his office with all sorts of slily rumors which a very little trouble on the part of the informant would have proved absurdaving the Sheriff and his staff much unnecessary labor and expense.

The Shingle Springs incident is but one of many. Case and his companions visited the place Monday night, secured food and attracted no-little attention by their peculiar actions, and yet no one in Shingle Springs took the trouble to send the news to the Sheaff. Had it not been for the interest shown in the matter by Mr. Scott, of the firm of Scott & Gilbert of San Francisco, Sheriff Bosquit would have been unaware of the incident tonight.

Another thing which greatly handicaps and aggravates Sheriff Bosquit, he states, is the lack of financial support extended him to spend one cent on its account, and the Supervisors of El Dorado county have thus far incurred in this county in outfitting the posses, for telephone and telegraph charges and numerous incidentals necessary in prosecution of the search, the Sheriff says, has been paid from his private funds.

It is expected that Sheriff Norman's posse will be in close proximity to the fleeing convicts tomorrow.

Sheriff Bosquit has received no word from the posse today, and is unable to confirm above reports. When Sheriff Norman left Oleta, it was Bosquit's understanding that Norman would keep him thoroughly posted in the event of any important change in his plans, or of any momentous development in the chase. It is believed at the Sheriff's office, however, that Wyatt, Colvin and Gignac, the trio which left here Monday night have been at the heels of the convicts, literally speaking, all day. the convicts, literally speaking, all day and that the three men are simply waiting for a favorable opportunity to close in on them, or to force the quir tette into the trap laid for them b

If the hounds again fail take the scent, the operator said to take the scent, the operator said, Sheriff Bosquit had stated he would take them to Shingle Springs, where Convict Case is reported to have been seen last Monday night. Warden Wilkinson also received a re-

port from Lester Hancock, stating that Richard Roberts, an employé of the Gray-Wing mine, who resides at Clarksville, had told him he had been Clarksville, had told him he had been informed by two brothers named Freeman that last evening, about 5 o'clock, they had seen three of the escaped convicts about two or three miles from Clarksville. The Freemans told Roberts that all the threemen were heavily armed with rifles and revolvers and one of them carried a sack filled with provisions. They passed along the wagonroad in front of the Freeman place and asked where they could find place and asked where they could find water. They said they were about worn out, according to Roberts's report, due in a large measure to lack of water. The men were directed to a spring about a mile away, and they started in its direction.

Roberts informed the prison authorities that the spring is the only place at which to get water, except the mine in Marco Valley. Roberts stated he

The Freemans said that none of the men was colored, so it appears Seavis is still in the Webber Creek country. The country back of Clarks-ville has a heavy growth of greasewood and sagebrush, and offers shelter to anyone in hiding.

Sheriff Bosquit was notified of the reported presence of the men near Clarksville, and he informed the prison officials he would investigate, but he gave them to understand that he did not attach much importance to the re-

Altogether, twenty-six battleships and thirty-six cruisers will be entered in a contest for the command of the seb between two maritime countries.

The opposing fleets are represented by the letters B and X, the former being the home fleet, which is divided into two squadrons, one at Berehaven, Ireland, commanded by Admiral Wilson, and the other at Madeira, under Lord Charles Beresford.

The problem for the home fleet is to effect a function of forces at sea, while on Admiral Dinville, in command of the X fleet, concentrated at Lagos. [BY DIRECT WIRE TO THE TIMES.]

OMAHA (Neb.) Aug. 5.—[Exclusive Dispatch.] Sid Anderson and Johnson, the two striking union watters who were imprisoned in Omaha for passing "unfair" cards in the streets, are not satisfied with the decision of the Supreme Court, which held that their imprisonment was wholly within the pale of the law and not contrary to the constitutional privileges of free speech and freedom of the press. The attorney of the Waiters Union, John O. Yeiser, has filed a motion for a rehearing in the Supreme Court accompanied by the lengthy brief setting forth the reasons why he thinks the verdict of the court was other than it should have been. The suit was begun some months ago in habeas corpus proceedings to secure the release of the two men from the City Jail in Omaha, where they were held in default of payment of a fine imposed upon them. Though the men have long been released, their terms having been served, they are determined to fight the case to the end, because of the constitutional questions involved and to secure the rivilege in future contingencies of being allowed to pass out cards on the streets.

QUICK RICHNESS LEADS TO ARRESTS

(BY DIRECT WIRE TO THE TIMES.)

"The firm of Daniels & Co., Incorporated, has been an object of suspicion for some time. We have received many complaints against them, but were never able to find Thomas P. Daniels, head of the firm. The firm did promoting and underwriting business. The incorporators were Thomas P. Daniels, Ellaha S. Caldwell and A. E. Caldwell. Those who were arrested are Thomas P. Daniels, Elisha Caldwell, Richard Woods, John Avery, Samuel R. Buller, Charles Brown and Alfred Bogg.
"Regarding the extent of the firm's business, I will say it was large; judging from the fact that they had branch offices in Philadelphia, San Francisco, London. Boston, Cincinnati, Atlanta, Chicage and St. Leuis."

N EW YORK, Aug. 5.—[Exclusive Dispatch.] The firm of Daniels & Co., No. 6 Wall street, was raided today. The following statement was given out by Inspector McCluskey at police headquarters:

"The firm of Daniels & Co., Incorportated, has been an object of suspicion for some time. We have received many complaints against them, but were averaging to the form of the company to supply the necessary capital to public attention by the roughly to the public attention by the roughly the roughly the public attention by the roughly the roughly the roughly the public attention by the roughly the roughly the public attention by the roughly the roughly that a find the public attention by the roughly the roughly that a find the public attention by the roughly the roughly that a find the public attention by the roughly the public attention by the roughly that a find the public attention by the roughly that a find the public attention by the roughly that a find the public attention by the roughly that a find the public attention by the roughly that a find the public attention by the roughly and the roughly and the roughly and because the first and the roughly attention by the roughly and the rou the necessary capital for public school loans, county bonds, water, light and leans, county bonds, water, light and power companies, steam and electric railways, patents and industrial enterprises" of most any promise.

More warrants were issued on the specific complaint of Edwin E. Collins of Cedar Rapids, Iowa, that he had lost \$150 through the firm. Collins told the police, however, that he had given almost \$1000 to the firm and had never received a penny from them in raturn.

The coroner's jury that investigated the mine accident at Hanna, Wyo., June 30, found that the explosion was caused by the ignition of gas in some manner unknown.

LIND'S FIRM SUSPENDED.

POWDERS FOR TWO RACES.

(BY THE ASSOCIATED PRESS-P.M.)

CHICAGO, Aug. 5.—The racing firm of Lind & Co. of San Francisco, Jockey Treanor, James Lynch, and James Harris, the latter two employes of the Arthur stable, were ruled off the turf today by the stewards of the Harlem Jockey Club and the Chicago Jockey Club. The action taken by the Harlem officials was due to the poor showing made by Orsina last Monday, when it was alleged she was deliberately pulled by Jockey Treanor and the race was allowed to go to Postmaster Wyight.

In the July selling stakes at Hawthorne, last week, Bondage, heavily POWDERS FOR TWO RACES.

backed by his owner, James Arthur, ran a bad last, and complaint was made that the horse had been tampered with. An investigation was started by the track officers, and it is claimed that evidence was secured showing that James Crabb, an employe of the Arthur stable, had given Bondage two powders and that they had come from the Lind stable, which had Orsina in the same race.

Departed—Deer Hunters Taking a Rost—Record-breaking Sale of Guns

the others mean to wait until the latter part.

All the local sporting goods houses report a record-breaking sale of guns. Whether it is due to a general awakening of the public to the inducements Southern California has to offer sportsmen, or to natural increase of population, none of the gun clerks are prepared to say, but they all admit the fact.

At Ocean Park Sunday there will be another hluerock shoot. J. Ed Vaughan is bringing it off, aided by a number of other saucer smashers. Vaughan says he expects there will be a crowd this time, which is well, for the last few shoots at that place have failed to attract the bluerock fraternity to any great number.

WAR NEXT YEAR.

WAR NEXT YEAR.

HART FULL OF FIGHT.

Another change has been made in the schedule of the Pacific National League and it would not be surprising if some of the teams returned here to play the latter part of August, instead of the second week in September.

Just why this change has been made from the schedule as adopted a month or so ago at the league meeting in Tacoma, is not known here, but it is presumed that the Pacific National magnates see they made a mistake in not having more baseball in California and less in the Northwest.

Now it seems things are to change, for Henry Hart of San Francisco, who now owns the San Francisco and Los Angeles clubs of the Pacific Nationals, is to bring them to San Francisco, where they will play one or more series, the first to begin August it. Greeley Bentley, who is president of the Los Angeles club, thinks the teams will draw well in San Francisco.

It seems from the statement of Mr. Bentley, that there may be "something diding" in California next year in the way of opposition duba, for Hart, it appears, is determined to put clubs into both Bacramento and Oakland. Judging from intimations that have sifted down here fro mthe Northwest, thay will be much more strongly supported next year than they were this year, as far as good players are concerned.

From all accounts, Hart appears to be a game sport, for he losses his money and spends it like a worthless foreign prince who has just married some fool American hetress.

NO WONDER THEY RAN.

Capt. Charles T. Hinde recently took a trip to the country wilds, with a party on board his new automobile. While skimming over the road near famul, an Indian woman with a small boy was observed approaching along the road. Alive to the danger, the chauffeur sounded his note of warning, which is enough to frighten a less subserstitious being than the poor Indian. The sound of the horn created a panie in the Indian conveyance. The woman left the wagon on one side, the boy took the other, while the horse tried to make all quarters of the sompass at the same moment, and it took Capt. Hinde some time to restore confidence and order, and the forest that their lives were not in danger.

formulas are known only to the State Board of Trade. At the time of the Chicago Fair, before these preparations had been perfected, the matural color of the fruit was lost in preserving, almost all varieties turning the same brown hue, so that the true value of such exhibits was lost. The greens always disappeared. Now, in the wonderful color-coaxing liquid, the greens gradually dawn again from the dirty brown, until the fruit seemingly is as perfect as when it came from the hand of God.

THURSDAY, AUGUST 6, 1903.

"The success of the process," said Mr. Wilson yesterday, "is not only in preparing the chemicals, but in knowing just how to handle the fruit; to know just how long to let it stand in certain preparations, how often to change the solution, etc. Different fruits have characteristics requiring different treatment, and only long experience can make success possible. So far there has not been an unsuccessful jar of fruit in the present lot. This will be the finest and largest exhibit of the kind ever put out by us. The fruits are by far the best we have ever had."

hibit of the kind ever put out by us. The fruits are by far the best we have ever had."

There are upward of thirty-five varieties now in jars, including green walnuts. A vault is necessary in which to set the fruit away while in preparation, as the temperature of the store-room should be from 60 to 65 deg., and daylight is objectionable, though artificial light does no harm.

Figs, nectarines and apricots are the hardest varieties to prepare, as they have a tendency to crack. Satsuma plums are the quickest to turn brown, and their deep-blood color is hard to reëstablish, though the secret solution overcomes even their stubbornness.

One of the rarest exhibits of the collection so far is a beautiful coccanut palm blossom, three feet in length, taken from a palm in the gardens of Ad Petsch, corner Figueroa and Twenty-second streets. An immense jar 11% inches in diameter and 24 inches in height, contains two branches laden with golden plums, interspersed with green leaves, just as they came from the tree. Early grapes have already been set away on the shelves, to await the surprise parties which they sto to tender the easterners in the latter's native lair.

As a single item of the expense of this work may be cited glycerine, of which Mr. Wilson uses \$30 worth a day.

they could be used in the stupendous task of preparing the St. Louis exhibits.

Since July 14 Charley Wilson, the Chamber of Commerce expert whose tireless experiments brought forth the chemical formulas whereby the fruits of Southern California are preserved for exhibition in a manner unparalleled in the country, retaining their exact natural color, has been putting fruits through the various processes. Every day consignments of luscious fruits disappear into the dark depths of the growing building; and they will not reappear until late in February when, in glass vases and jars, they will start for the big show at St. Louis. Six hundred jars of fruit have been stored on the shelves in the vault, and 1206 additional empty jars have been ordered; how many more will be used cannot yet be estimated.

It takes three months to complete the elaborate preserving process. The fruit must go through one liquid to set its color, another to preserve the feeth, another to harden it so that it will not "squash" in the jars, another to bring back the color which the former chemicals have deadened; and then it goes into the clear liquid in which it is seen by the visitor at the fair, a preparation which neither distorts the proportions of the individual fruit to the eye, nor soaks its natural characteristics away.

The settlement was reached in the Federal court yesterday. At the close of the courts in the afternoon Judge Weilborn had not signed an order confirming it and appointing W. J. Doran trustee, but it is understood that his signature will not be withheld after certain technical objections have been removed.

The Wigmores agreed to settle on the basis of 50 cents on the dollar, payable in four notes in three, six, nine and twelve months after date of the confirmation of the composition. All property is to be turned over to the trustee to secure the notes to be executed. One of the clauses of the agreement is that Harriette J. UNCLE SAM CHOOSES RESERVOIR LOCATION.

Information which appears to signify that the government has selected a large tract of land in the southeastern part of San Diego county for a reservoir site in connection with the work proposed along the Colorado River under the provisions of the National Irrigation Bill, has reached the United States Land Office here. The local authorities have received a telegram from the General Land Office in Washington ordering the withdrawal from all forms of disposal upwards of 12,000 acres of government land lying in the bend of the Colorado River, on the California side, just north of the Tuma Indian Reservation.

This land had already been withdrawn from all save homestead entry under the irrigation act, but it is now entirely withheld. It is the first tract in Southern California to be thus reserved exclusively to the government, which fact carries the impression that it has been recommended by the ex-

JUSTICE OF PEACE

AFRAID OF HIS OWN BONFIRE?

THE PUBLIC SERVICE—OFFICIAL DOINGS.

caine a speech from Councilman J. P. Davenport of the Sixth Ward at the special Council session yesterday morning. His deep voice rolled and reverberated through the legislative chamber in well-rounded périods and in the end brought down upon his head a sizrm of indignant protest from other members of the Council the like of which has not occurred in a City Council for years.

All the City Fathers, except Todd and Nofaiger were present, and all were taken unawares. Before the session President Bowen informed the City Attorney that the Council would be in session about three minutes.

"There are just two demands and a motion to be passed upon," he said.

And it is safe to say that Bowen was as much surprised as anyone in the room when, toward the close of the short session, Davenport rose slowly to his feet, and in a quiet, even voice saked the attention of the Council. It was noted before the session that Deviaport was nervous and apparently perplexed, but all the legislators were unaware of what was coming when the lixth Warder began:

"I believe in the right. I believe that right wrongs nobody. A wrong has been committed by this Council in the doption of a resolution last Monday. I was present in the committee-room. heard the resolution read. It is true hat I believed I knew all that it contained, and that I was voting upon the resolution intelligently."

The faces of the Councilmen were a tudy. As Davenport paused for breath ruick giances were exchanged along the Council crescent, but none of the Councilmen were in the secret of the Sixth Warder's move. Sheer amassement was lepicted on Bowen's face. Davenport ontinued:

"Now a wrong righted is hatter than There are just two demands and as much surprised as anyone in the room when, toward the close of the from when, toward the close of the first two demands as much surprised as anyone in the room when, toward the close of the first two demands are the season that Devrage and the first two demands and the first two deman

cli—ther the members of the former Council of whom there are but two in this body and the City Attorney have been treated with great disrespect. No man can say that there is anything wrong with that resolution. It fixes the responsibility where it, belongs and without any charges of malfeasance in office or criminal neglect, either. It was a dignified report and the only report the Council could make under the circumstances, and it; was made at the proper time."

"This is too childish to talk about," exclaimed Skilling in disgust.

Davenport made another speech in defense of his position and read the last paragraph of the resolution again.

"It says 'we feel confident," declared Farish, which was a statement not expected from the Democratic side of the house. "The Mayor appointed the Board of Health and he is responsible for their actions. Furthermore, when the board recommended that the contract be rescinded was it not the direct result of and in accordance with the findings of the Chief Executive. We did what was right and I propose to stand by it. There

Court of his motion. The other six legislators' gave utterance to stentorian "noes" as "ir names were called. The session imediately broke up without the formality of a motion to adjourn.

It was the prevailing opinion among those best informed that Davenport had been approached by some agent of Mayor Snyder, who was desirous of stirring up an internecine warfare in the Council. Davenport had no explanation to make and Mayor Snyder who was easirous of stirring up an internecine warfare in the Council. Davenport had no explanation to make and Mayor Snyder, who was explanation to make and Mayor Snyder who was explanation to put in an appearance at the City Hall.

Under the civil-service rules, as interpreted, it is stated that Wills would not have been confirmed in his position until August 9. It now appears as if Wills had lost his position, and is without any claim upon the city.

Another attempt to secure the approval of the Street Superintendent on the map of the Westmoreland tract was made yesterday afternoon by Wesley Clark of the real estate firm of Clark & Bryan. The effort was fruitless, however. Clark now proposes to give a bond guaranteeing that he will bring the street work in the Westmoreland tract up to the city specifications. Thus far this proposition has not been favorably received by the authorities.

JUSTICE OF PEACE

PUNCHED POSTMASTER.

As a result of punching the face of the postmaster, a warrant of arrest has issued for Justice of the Peace Coultiss of Chatsworth Park.

A complaint was drawn up yesterday by the District Attorney on complaint of A. L. Phillips, the Chatsworth Park postmaster who was thumped.

The row took place last Monday. Coultiss, besides being justice of the peace, runs an engine for the California Construction Company. Recently the Constable of the township brought up a drunk whom he found lying half undressed on the road. The justice of the peace refused to leave his engine to issue a warrant, and told the Constable was not disposed to hold the was allowed to go.

The incident was called to the attention of the District Attorney, and by him called to the attention of the District Attorney, and by him called to the attention of the District Attorney, and by him called to the attention of the District Attorney, and went down to his country store and "handed him a couple" in the tace. escape the horrible doom that threatened her. She did grow better for a time, but it was only the mocking of a grim relentiess fate. She came down again worse than before.

Her mother spent all the money she had in the world, trying to do something for the child. They wandered all over the country. As a last forlorn hope, they came to California.

The child has only grown worse here. At last, their money sone, the mother sunk into consumption, as a result of her exhausting care of the child, they came under the supervision of the Associated Charities.

The little girl was sent to the California Hospital, but they couldn't keep her forever there. She was sent home. She was a little better for a day or so, then became worse than before. When the mother came to the realisation that every hope was gone, her own strength gave way. She had a terrible hemorrhage and was taken to the hospital.

The only thing there was left to dowas to bring an insanity complaint against the child. This was brought by the mother.

When the child was brought into court yesterday, there was not a sign of intelligence in her face. She clung to her mother's hand, and was terrified when their hands parted. Her hig blue eyes filled with tears and she whimpered unintelligible cibberish. Since this terrible affliction has become upon her, the' child has become upon her, the' child has become slovenly and filthy, like some uncledn animal.

The doctors say there is no hope for her. The process of degeneration has set in and its end is more horrible than death.

A half brother of the child's father, who has given up business in the East to come here and support her and her mother's had a support her and her mother, told Judge Trask about it, He cried like a child.

Those who mean to eat meat today bought it yesterday, or will have to go to restaurants, for the Retail Butchers' Association has hung out the "nothing doing" sign on the shops today.

The annual outing of the association is to be held at Verdugo and special trains will be run at various hours today in addition to the usual schedule. A programme of the customary sports has been arranged and no end of fun is anticipated.

The retail grocers are also taking a day off, and the lot of the improvident housewife is therefore doubly a hard one.

Today's preliminary trial of three of the young men charged with riot in connection with the Los Angeles Record excursion to this city on July 26 developed a lack of identification of two of the defendants. The young men in court today in answer to the charge were Thomas Whittman, slightly colored, and Frank Oden and John Larala. The charge placed against them was riot, a high-grade misdementor, on which charge a preliminary examination may be held in a justice's court, but on which a tiral can be held only in the Superior Court. The complaint alleges against them jointly that they did "by the use of force and violence disturb the public peace."

The incident complained of was the improarious behavior of the mob about the station of the miniature railroad. Witnesses summoned failed to show that Oden and Larala were in the SAWTELLE, Aug. 5.-This evening

OUTING TO THE POOR.

Over three hundred women and children were given a day's outing at Long Beach today by the Salvation Army. The day passed without a hitch and was entirely successful. By the courtesy of J. Ross Clark the excursion was over the Salt Lake R. R., three cars being placed at the disposal of the Salvationists, the rallway officials showing every courtesy and giving every accommodation. R. S. Dake of the Long Beach Bath House Company, helped very much with the day's entertainment by furnishing free bathing suits to the excursionists. Bountiful lunch was supplied to every participant. Ice cream and cake were also served free. Two cases of oranges were consumed between meals, also several gallons of milk.

The majority of the excursionists selected by the Salvationists were of the very poorest class, and the day was to them a most appreciated and unusual event.

TOW ALMOST LOST.

SAN PEDRO, Aug. 5.—The steamer Centralia, which arrived in port yesterday with a cargo of lumber from Aberdeen. Wash, reports having encountered heavy southwest gales of Point Sur Monday. The vessel served in tow the new government steamer Alert, which she picked up at San Francisco. Capt. Briccson of the Centralia said that at one time during the gale the two wire hausers holding the Alert in tow broke, and caused much anxiety for the vessel's safety. It was only after the skillful management of Capt. Moody, in command of the Alert, that the vessel was safely brought about, and the lines again made fast to the Centralia.

The Alert was built in San Francisco, to do quarantine work at San Diego. She is 55 feet in length, has an Il-foot beam, and draws 5% feet of water. Today Capt. Moody shipped a crew and salled for San Diego.

New York asleep.

New York is never entirely asleep, but possibly 3,000,000 of her inhabitants dose part of the night. We roar ourselves to sleep. The process is very gradual. Early infancy and senile eld age retire with the chickens. The gay, throng of youth and middle age makes a hot pace till midnight, then slowly the pulse begins to grow feebla. By 1 o'clock nearly all honest folk are in bed, leaving the city to the rounders. Cars run at long intervals, Now and then a carriage gives a flutter. Imagine 3,000,000 persons lying or the "dead level" for six or seven hours, some on pillows of down, some on curbstones, some beneath silken counterpanes, some beneath silken counterpanes, some beneath the stargangied blue quilt of heaven. Queer figures they make, to be sure. [New York Press.]

The Cut Set in Agate.

The news was more thrilling than a bank robbery or a train hold-up as it came hot from the labor-reporter's typewriter. At a convenient place in the story of the get-rich-quick scheme of the walking delegate the reporter inserted a line reading: "Cut of Parks." The facetious copy reader added: "Set cut of Parks in agate." The night editor and copy cutter skipped the witticism, and it got to machine No. 13. The operator knew the possibilities of his Mergenthaler, and when the proof of the story came to the night editor's desk, there was the cut of the hero of a hundred forceful "touches" set in agate all right, as it is here reproduced:

Why This Store Closes

On Saturday Afternoon and Evening-Not Thursday.

While Saturday afternoon closing is not a novelty in the eastern cities, Hamburger's is the first department store on the entire Pacific Coast to grant such holiday to its employés. This is a matter which religious and civic societies have contended for several years. A firm that strikes out boildy and takes the initiative in a reform movement rightly deserves the commendation of that part of the public who are interested in the amelioration of the conditions surrounding working people. Hamburger's did not wait for some one else to take the lead; nor did they ask the cooperation of any other store or public body which is unlike the plaintive note to the Merchants' and Manufacturers' Association by another firm stating that such firm hoped the day might come when Saturday afternoon and evening closing might be general in this city; and yet did the very thing which could be of but little service to employes—namely, Thursday half holiday. Saturday half holidays are the most beneficial for the physical strain of long hours of labor. Saturday, especially in the hot period of summer, is such on the employes of large stores that they cannot possibly feel refreshed enough to attend divine service on Sunday, but must take a part or all of the day for rest and recreation. In closing on Saturday afternoon and evening during July and August we are practically giving our employes nine days' vacation of nine hours each and this with pay. Furthermore, it applies to all the employes of the house regardless of time of service and is not a "grand stand" play to the public of a week's vacation with pay until forced from cover to acknowledge that such vacation means those who have been employed a long time and affects less than two score of employes; and such vacation of one week also coupled with a compulsory vacation of one additional week to save penses and to reimburse such firm for its magnanimous (?) treatment. The public knows just how to take such

ALL SORTS OF PEOPLE.

ORCED ASSOCIATION WITH DISACREE ABLE PEOPLE—HASTY INTIMACES—RESTRAINT ON CHILDREN — PATIENCE AND PHILOSOPHY DEMANDED AS TABLENCE OF ONE'S HOME COMPORTS.

(Author of "In City Tenta." etc.)

I takes all sorts of people to make up a summer boarding-house. And it is not much better if you call the boarding-house a hotel and have a clerk instead of a landlord.

In spite of much experience to the contrary, there is still a large number of persons who, when they go away to the country for the season or part of it, go with a well-defined impression that they will be as comfortable there as they were at home. They know, of course, that they may not have as much space and the table may possibly leave something to be desired—although upon that ground there is always a happy tendency to optimism. But the prospective hoarders tell themselves that there will be other advantages that will make up for descences. And in that pleasing expectation they leave home for the country or the seaside.

DISCOMFORTS IN THE COUNTRY.

piscomforts in the country.
Then, when they are once settled, they find that the good points are fewer and the bad points more plentiful than they had imagined and a seign of discomfort begins.

It is a common thing at this season of the year to read instructions to persons going away on a vacation as to what they would better take with them in the way of equipment. The contents of their trunks or their kitches is a matter of comparative importance, so long as they carry a sufficient store of patience and philosophy.

In families.

Never does one appreciate how many different kinds of persons there are in the world so well as at a boarding-house. To think there should be such a variety and none of them "our kind!" The boarder of a critical dispation has every opportunity for maining into a rank pessimist before the map of the season.

UNPLEASANT COMPANIONS.

Tet there is no real necessity for making so serious a matter of the associations into which one is thrown on owes vacation. That is, if the philosophy I have advocated is brought to bear upon the situation. And the first use is which it/may be put is to teach its person to avoid hasty intimacies. Such intimacies are much more easily formed than broken off. It is a natural thing to drift into passar charant the common ground of a grievance assist the house is rarely lacking to draw strangers together. It is not wise to be ungracious and to reject andly advances. Many delightful fifendatips have been formed under just such circumstances. But it is well to be a little reticent at first and not take a new acquaintance into your heart and confidence until your knowledge of him—or of her—has progressed a little beyond the first agreeable impression. The mother of a family who goes to a boarding-house for the summer should try to carry a certain amount of the rome atmosphere with her. She need not dismiss her children entirely from her mind, just because they are in the country, as seems to be the way of some parents. It is better for the children to have a few regular habits, if no no of the best conducted families I even knew the small boys and girls had their little holiday tasks and were apparently much the better and the happier for the practice of some occupation every day. The first thing after to a secluded corner of the big very lone of some kind. The entire "exercises" took less than an hour, and when they were over the children were free for the day. They never seemed to object to the task, and the rule was not so, ast-iron that it could not be waived if there were some excursion or other plan on hand that demanded departure from the house immediately after trom the ho

customed to what is good and even elegant.
"Depend upon it," I heard an astute observer say at one time, "that the persons who criticize everything in traveling or in boarding and are un-

willing to put up with trifling discomforts without making a great fuss about it, are almost always those who are not used to the best at home. They think they show their familiarity with elegance by finding fault."

This is very likely to be the case. Those who fare delicately at home feel that they can afford to bear a little privation when away, while those who look forward to their outings to give them the "frilis" they do not have in their own houses are naturally aggrieved when their expectations are not realized.

The Mutual Life Insurance Company of New York is constantly demonstrating its ability and experience in advising business men concerning money matters in the home. For instance:

The late Archibald N. Waterhouse, of Philadelphia, who died suddenly last Friday, held policies amounting to \$80,000 in The Mutual Life Insurance Company of New York. The forms of insurance under which these policies were issued were so selected that his widow will receive at once \$20,000 in cash and an annual income of \$3,000 for twenty years, and if she is living at the end of that period she will receive \$60,000 in cash, making the total amount received under these policies \$140,000, on which the premiums paid by Mr. Waterhouse amounted to only \$27,492 20.

TASTY RECIPES

Recipe for Curing Beef and Hams.

(Contributed.)

Two gallons of pure water and a quantity of salt known as "ice cream salt." Let all stand over night. If strong enough it will float a medium-sized potato. If not, add more salt. Place on the stove to come to a boil. Add three pints of pure New Orleans molasses (the adulterated would spoil the meat). Continue to boil and skim off what comes to the top until no more rises. Add a small tablespoonful of saltpetre. Pour on the meat while hot, weight down and put in a cool. place. Let it stand twenty-one days. Remove the meat from brine and hang behind the kitchen range to cure.

This will answer for forty pounds of meat, which should be cut in about

and hang behind the kitchen range to cure.

This will answer for forty pounds of meat, which should be cut in about six or seven pound pieces.

Hams must be smoked after coming from the brine. This will answer for corn beef that will be used up in a few weeks, and will be found most delicious. To keep for a long time omit the molasses. The above will answer for pickled pork. The pork should be salted with common salt and stand for a while before putting into the brine and remain until used. Keep weighted and covered with the brine; also cover top of barrel or crock. Allow the brine to become cold before pouring over the pork. Omit the molasses in curing pork. The hams should stand in salt to cure before putting into the brine.

(Contributed.)

To two tablespoonfuls of grated chocolate add an equal amount of sugar and enough water to moisten. Bring to a boil, and when cool add a spoonful at a time to the stiffly beaten whites of two eggs. Flavor with vanilla. Beat well and serve in tall glasses with a spoonful of boiled frosting or whipped cream.

Representative American Women

MRS. RUSSELL SAGE

There is no woman better fitted to discuss the conditions of social life as it is to-day than Mr.

The great wealth of her famous husband, together with her own broad intellectual qualities and gracious manners, have rendered her conspicuous for decades. She might at any time, had she so chosen, become the head of that set which dictates manners and customs to the admitting multitude around them. But Mrs. Sage finds more profit in standing outside the charmed circle and observing philosophically what goes on within, secure always in the knowledge that it is only necessary for her to nod her head and the most exclusive of the haughty dames would respond eagerly.

In the field of educational work Mrs. Sage has always found her most congenial occupation.

She is ready to aid every movement that looks to the intellectual improvement of her sex. Charity work among the very poor has likewise claimed much of her time.

Therefore it surprises me when I see "society women" set apart in the general press as a distinct species in natural history.

The girl of wealth and position loves the man her heart has chosen quite as wholly and unselfishly as the girl who knows little of convention, but his does not mean much but, after all, they do not subvert and but little affect the instincts of women.

We are much alike the world over, and beneath the thin external much the same feelings prevail in all classes.

Therefore it surprises me when I see "society women" set apart in the general press as a distinct species in natural history.

The girl of wealth and position loves the man her heart has chosen quite as wholly and unselfishly as the girl who must work for her living loves her sweetheart.

Good form to which she has been raised, may forbid her to be so demonstrative as the girl who knows little of convention, but this does not mean that she feels less strongly.

Society women marry the men they now any of cases. They do not langualty of cases. They do not langualt

She must, be an efficient manager of her household. She may pay her chef thousands and have the most competent of housekeepers, but unless her hands hold the reins her house and her entertainments will soon show it. You may see her in the smartest of freeks rolling along in the most luxurious of carriages, and she may have a very weary body and even a dejected heart. But very likely she dares not plead the one as an excuse from an engagement or show the other to the world. For there are scores of prying eyes turned ever upon the woman of wealth sind high position.

In the season she may be late in her bed in the morning and even then not get as much rest as her washerwoman, for her feet are on the path to which she has been called, and while that path is there she must tread it.

But let no one imagine that dinners and dances and launching of doutantes are all of the things that demand her time and strength.

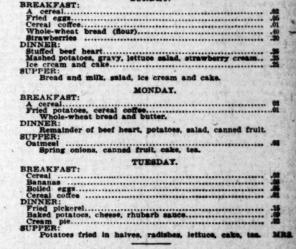

Twice a week matrons and maids of society will get together at the composition of some harticine eventuals and newspapers and work for hours sorting dusty and heavy contributions. They are merry and good-natured about it. It is said that the rich patronize the poor, it is not recognized that a woman of delicate senses cannot go among the scenes and scents of poverty without positive suffering to herself.

Bhe sees there what she cannot really remedy, but can only relieve by charity. If she faces these things and gives, then there rise up thoughtless people discredit her efforts by accusing her of patronizing the poor.

She cannot live with them as sisters, but nevertheless many a poor woman has felt the sisterly pressure of the society woman's hands and many sick, poor bables have been tenderly held in her pitying arms.

IDYLLWILD (Strawberry Valley) Aug. 5.—The lectures in the course on forestry are increasing in interest. Dr. Jepson has finished his series on the life history of a tree, which consisted of four lectures on the activities, structure and methods of reproduction of a coulterl pine, which was used as a type of all forest trees. He has begun his series of lectures on the "Classification of Forest Trees." He demonstrated their scientific classification, based on the previous lectures, and considered all varieties in California. After illustrating the great scientific

Iter illustrating the great scientific uses. he went on to show how the pular terms like "hard" or "soft sod," "broad-leaved trees," oh "evercens" are of value in helping out scitific terms. He also took up the milles of beach class and the charactistics they have in common by which ey can be recognized. Material from esurrounding forest was used to monstrate these points.

Professor Stubenrauch has compared the economic discussion of fortry, and is taking ap the different whods of measuring the forest cropulch includes not only the measuring the amount of material actually on and, but also the amount of material ing produced from year to year, or om period to period, the periods setted being usually ten years. The deer season in Riverside county opened August I and numerous parties are out armed with permits and rifles in search of game. The first meat to be brought into camp at Idyllwild fell under the rifle of E. H. Bagley of Los Angeles, who is staying at the Lodge. The party, which returned Sunday, included James Shepard and John Blodgett of the Keen Camp, each of whom secured a deer, and F. M. Thornton, forest ranger. on forest ranger.

BALLOT MACHINES FAVORED. RIVERSIDE, Aug. 5.—At the monthly meeting this morning the County Board of Supervisors considered the advisability of installing ballot machines in parts of the county where precincts can be combined. In the city of Riverside there are now twelve precincts, and one or more would be necessary before another election. If ballot machines are adopted only four will be required in the city, one at Corona and one at San Jacinto. In other parts of the county the old system would still be used. Each machine would cost about \$400, and there would be a saving of \$50 on each election precinct cut out. The board is favorably disposed concerning the adoption of the ballot machines and will appoint a committee advisability of installing ballot ma-

CONTINGENT PROPOSITION. Attorney Lafayette Gill has made a roposition to the Board of Supervisproposition to the Board of Supervisors to collect a large amount of money from the State which he says is due the county. He claims that each county in the State has been paying over to the State at the yearly settlements made by the county auditors, on account of penalty on delinquent tax sales more money than the State is entitled to because of a wrong construction of the State law. This has been going on for many years and Mr. Gill is so certain that he can recover a large amount of money for the county that he is willing to pay all costs, do all the work, and not receive any compensation unless he succeeds, in which case he wants a good percentage of the amount recovered. The Board of Supervisors went into executive session and discussed the matter with him, but have as yet taken no official action in the matter.

ANOTHER HOUSE ROBBED. Ernest Lukens on Stillman avenue was broken into Monday night while the family were away at the beach. A neighbor heard water running and persons moving about in the house during the night and yesterday went to the rental agent to see if the house had been taken by another tenant. He was told that it was still held by Lukens, whose family were absent. The officers were then notified and investigation proved that the house had been ransacked from one end to the other. Bureau drawers and bedding had been scattered about the floor. It is impossibute to tell whether anything is missing until the return of the family.

critical condition at his home south of town, and his death is anticipated. Bovee was thrown down an embankent among a pile of rocks, and it has ment among a pile of rocks, and it has developed that the bones of his face were fractured. There are also strong indications of internal injuries. His family, which resides at Williamsport, Pa., has been wired concerning the grave change in his condition. Angus Tremble, one of the thugs, practically admits that the object of the hold-up was robbery, and that they were scared off before they could search their victims.

MIGHT HAVE LYNCHED HIM.
Deputy Sheriff Bagley last night ar-

to assault an estimable young woman of the town who was accosted by the Mexican as she was on her way home after dark. The matter was kept quiet, owing to a fear that the citizens might take the law in their own hands should they become acquainted with the facts. During the night some of the prisoner's friends, after vainly trying to open a way of escape from the jail, handed through the bars a flask of whisky suposed to have been drugged, and the prisoner has been in so deep a stupor that his trial had to be indefinitel postponed.

The plaintiff is given five days in which to file an amended complaint, but in the meantime the pipe line has been carted off by the defendants.

An exciting runaway occurred yesterday, a team of horses belonging to Daniel Hayes racing for several blocks through town, dragging a heavy wagon. At the corner of Eighth and C streets, the wagon collided with a fire hydrant, snapping it off near the ground, and sending an imense column of water high into the air. The section was almost flooded before the water could be turned off.

A FINE IN SANTA ANA.

CARVED HER NAME ON TREE AND WAS PROSECUTED.

Offense Committed While at a Picnic in Disregard of County Ordinance. Wedding Bells Ring for Two Wellknown Young Couples.

SANTA ANA, Aug. 5.—Sister Buenaventa de Farre of the Anaheim Catholic Orphanage paid a fine of ten dollars in the township court here today on a charge of malicious mischief in defacing one of the big live oaks in the Orange County Park recently. The sister was at the park in charge of a crowd of children from the orphanage who were enjoying a picnic under the trees, and during the course of the afternoon conceived and executed the idea of carving her full name on one of the largest oaks in the grove. A face of the tree was cut off with an ax to afford a smooth sur-face and her name followed by the letters "S. F." carved upon it. The county ordinance forbids any mutilsletters "S. F." carved upon it, The county ordinance forbids any mutilation of the park trees, and inasmuch as a conspicuous notice to that effect' was posted on the very tree upon which Sister Buenaventa inscribed her name, the authorities decided to prosecute the case, and issued a warrant on the charge of malicious mischief. This morning the offender appeared before Justice Smithwick, pleaded guilty as charged and deposited 319 for the fine imposed.

CONCRETE SKYSCRAPER.

An Experiment in Architecture Being Tried in Cincinnati-Will Soon be in Shape for Use.

Shape for Use.

[New York Tribune.] In Cincinnati an experiment in construction is being made which is attracting the attention of builders, contractors and capitaBits. It is the erection of a skyscraper, with concrete for foundations, columns, girders, stairways and floors. It is to be a solid piece of concrete from the sub-foundations to the roof, practically one piece, as if carved from solid rock, except the exterior. For building purposes, concrete is as old as the hills. There are still standing small houses and arched bridges built before the Christian era. In late years some buildings, six to eight stories high, have been built, but the Ingails Building, fifteen stories high, is the most ambitious attempt yet made. It now approaches completion, and thus far there is nothing to indicate failure in any particular.

The process followed in the erection of the Ingails Building is known as "reinforced concrete." To erect a building of this nature the carpenter first constructs a mold or frame in sections. In the case of a column the mold is upright, and is almost watertight, being held by bolts and placed accurately by level and plumb. This is filled with concrete mixed and handled by machinery. An entire story is carried forward and upward at the same time, all girders, columns and floors of the story reaching completion at the same time, approximately. The moids are then removed, after the material has hardened, and placed in position for the next story, the workmen using the top floor as a foothold for the addition to be made.

Belle Newell had a long police record, and was known to nearly every member of the force. She came here about twelve years ago, a beautiful cirl, but it was not long until she was a woman of the town. She went from had to worse, and was arrested many limes for vagrancy and drunkenness. She was a street walker and also a "drunk roller." She made much money, and had the faculty of saving it. For years her mania was diamonds, and she possessed some very fine ones, hence the nickname which was given her. Once she was wanted in San Francisco for robbing a man, but he refused to prosecute her, and she was not sent for by the San Francisco autorities. For Dyspepsia and Stomach Trouble

Other Digestive Remedies Has

Really Catarrh.

E X. U. S. Senator M. C. Butler from South Carolina, was Senator from that state for two terms. In a recent letter to The Peruna Medicine Co., from Washington, D. C., says:

"I can recommend Peruna for dyspepaia and stomach trouble, I have been using your medicine for a short period and I feel very much relieved, It is indeed a wonderful medicine besides a good tonic."—M. C. Butler.

The only retievel way to the control of the control of

sides a good tonic,"—M. C. Butler.

The only rational way to cure dyspepsia is to remove the catarrh. Peruna cures catarrh. Peruna does not produce artificial digestion. It cures catarrh and leaves the stomach to perform digestion in a natural way. This is vastly better and safer than resorting to artificial methods.

Peruna has cured more cases of dyspepsia than all other remedies combined, simply because it cures catarrh wherever located. If catarrh is located in the head, Peruna cures it. If catarrh has fastened itself in the throat or bronchial tubes, Peruna cures it. When catarrh becomes settled in the stomach, Peruna cures it, as well in this location as in any other.

Peruna is not simply a remedy for dyspepsia. Peruna is a catarrh remedy. Peruna cures dyspepsia because it is generally dependent upon catarrh.

Where the oil has been properly applied and thoroughly incorporated with the street surface, oiled streets are said to be hardly inferior to asphalt, for the purposes of traffic, while they can be kept in good condition by an occasional reapplication of oil. day night there came one ray of saving light. It came from H. R. Whiliock, the man who did his duty and quelled the mob.

For an hour Danville had been given over to brutal cruelty. A miscreant mayor had permitted the mob to tear a prisoner from the city jail and terture him to death. Having tasted blood, the mob demanded more. There was a rush for the county jail and further victims.

There the mob met a man, and went down before him. Sheriff Whitlock warned and argued. He was answered with howls and an attempt to break down the jail door. He fired upon the mob.

down the jail door. He fired upon the mob.

The mob fell back howling. It had met its master. It stood off and threw stones for a time, but it dared net come again to close quarters with the one resolute man who paced up and down the jail veranda, his weapons ready. Finally the mob slunk back into the darkness, leaving the man alone, vigilant and triumphant.

That picture of Sheriff Whitlock pacing up and down, guarding the charge intrusted to him by the people and the laws of Illinois, is one that will not fade from the memory. It tells what is the kind of man who saves civilization from savagery.

As long as civilization can muster enough of that kind, it will endure. The man who knows his duty and does it, fearlessly, completely, to the end, at no matter what cost, is the real Pillar of Society which cannot be removed.—[Chicago Inter Ocean.

With regard to Christ Church building fund, Dr. Dowling, rector of the church, says that while the money has been raised to buy the lot and pay for the construction of the main body of the edifice, more money will be needed to complete and equip it. He adds:

"Nobedy knows how long it will be before the remainder of the building will be finished. That will depend entirely upon the generosity of those who have not yet contributed. It therease."

before the remainder of the building will be finished. That will depend entirely upon the generosity of those who have not yet contributed. If they shall show the same degree of willingness and enthusiasm as they have shown who have already made their offerings, the question will be settled, but if they do not, we shall simply consider it a providential indication that we are to workhip for the present in an unfinished structure. And in odoing we shall be just as happy, as though the whole edifice were complete. But there will be no begging, either in private or public. Whoever gives, will be permitted to do so, as a privilege to himself; not asked to do so, as a favor to anybody else. We do not intend to have if we can help it, an unwilling dollar in the whole concern. Of course, I have an idea that the congregation of Christ parish will not consent to worship in an unfinished building for any great length of time, but personally it will make little difference to me, either one way or the other."
